

TRAINING OBJECTIVE:

This session will help attendees understand the mechanical operation of a submersible pump, the proper way to troubleshoot an electrical control panel and the function of the electrical components within the control panel.

This session is for all water and wastewater operators, managers and technicians involved in the operations of water and wastewater treatment systems. All materials will be furnished for this session.

5.00 actual hours of training will be awarded for this session.

You **MUST** attend the entire session to receive credit hours and certificates.
