Provide summary of drinking water related training: This presentation will provide information on the U.S. EPA's Unregulated Contaminant Monitoring Rule (UCMR) that provides national occurrence data for unregulated contaminants in public drinking water to protect public health and support future regulatory decisions. Specifically, this session provides an overview of the UCMR 5 program and monitoring requirements for water systems, information on data access, resources for understanding the data, and a summary of the UCMR 5 results to date. Additionally, participants will receive an introduction to EPA's Office of Inspector General, IJA Funding, the State Revolving Fund, Fraud Awareness, and Whistleblower information. Finally, attendees will obtain an outline on the history of EPA drinking water method development for per- and polyfluoroalkyl substances (PFAS), including Methods 533 and 537.1, currently in use under UCMR 5. The presentation will also preview efforts underway to address the unique challenges of total PFAS analysis.
